

It has now been **20 years** since we helped our first client, a **British entrepreneur** who was opening a restaurant.

Over the course of the years we have learned that our **non-native clients** appreciate the fact that all the services they require in Spain are handled by a single individual, who speaks **their language**, and more than anything, understands **their needs**.

This is why we have been **expanding our network**, to enable us to offer a team of **specialised professionals** including tax advisers, lawyers, translators, estate agents and architects, who can **meet all your needs in Spain**.
